CE has never been more important!

The American Library Association recognizes the importance of education and continuous learning in providing the highest quality library service. The following information is from the ALA's [Education and Continuous Learning webpage](#).

“The ongoing revolution in information technology demands changes not only in what

“The Office 2010 webinars allowed me to confidently transfer into these new Microsoft programs without fear.”

Sylvia Martinez, Librarian Gustavus Public Library

we learn, but also in how we learn in the classroom and beyond. To succeed in this new environment means knowing how to access information, but also how to analyze and use it efficiently and effectively.

Keeping up with the explosion in information and technology challenges those in the work force to continually renew their skills and expand their knowledge. But education and lifelong learning are equally as important for the growing number of older Americans who may or may not be actively employed.

For people of all ages, lifelong learning is the key to longer, healthier, more satisfying and productive lives.

For librarians, continuous learning is critical to renewing the expertise and skills needed to teach and assist members of the public in the new information age.”

What can YOU do?

Make professional education and continuous learning a high priority for all library staff.

Make sure that you and your staff have the proper training and skills to assist library patrons and teach them about emerging technologies.

CE has never been more important!

The American Library Association recognizes the importance of education and continuous learning in providing the highest quality library service. The following information is from the ALA's [Education and Continuous Learning webpage](#).

“The ongoing revolution in information technology demands changes not only in what

“The Office 2010 webinars allowed me to confidently transfer into these new Microsoft programs without fear.”

Sylvia Martinez, Librarian Gustavus Public Library

we learn, but also in how we learn in the classroom and beyond. To succeed in this new environment means knowing how to access information, but also how to analyze and use it efficiently and effectively.

Keeping up with the explosion in information and technology challenges those in the work force to continually renew their skills and expand their knowledge. But education and lifelong learning are equally as important for the growing number of older Americans who may or may not be actively employed.

For people of all ages, lifelong learning is the key to longer, healthier, more satisfying and productive lives.

For librarians, continuous learning is critical to renewing the expertise and skills needed to teach and assist members of the public in the new information age.”

What can YOU do?

Make professional education and continuous learning a high priority for all library staff.

Make sure that you and your staff have the proper training and skills to assist library patrons and teach them about emerging technologies.

CE has never been more important!

The American Library Association recognizes the importance of education and continuous learning in providing the highest quality library service. The following information is from the ALA's [Education and Continuous Learning webpage](#).

“The ongoing revolution in information technology demands changes not only in what

“The Office 2010 webinars allowed me to confidently transfer into these new Microsoft programs without fear.”

Sylvia Martinez, Librarian Gustavus Public Library

we learn, but also in how we learn in the classroom and beyond. To succeed in this new environment means knowing how to access information, but also how to analyze and use it efficiently and effectively.

Keeping up with the explosion in information and technology challenges those in the work force to continually renew their skills and expand their knowledge. But education and lifelong learning are equally as important for the growing number of older Americans who may or may not be actively employed.

For people of all ages, lifelong learning is the key to longer, healthier, more satisfying and productive lives.

For librarians, continuous learning is critical to renewing the expertise and skills needed to teach and assist members of the public in the new information age.”

What can YOU do?

Make professional education and continuous learning a high priority for all library staff.

Make sure that you and your staff have the proper training and skills to assist library patrons and teach them about emerging technologies.

CE has never been more important!

The American Library Association recognizes the importance of education and continuous learning in providing the highest quality library service. The following information is from the ALA's [Education and Continuous Learning webpage](#).

“The ongoing revolution in information technology demands changes not only in what

“The Office 2010 webinars allowed me to confidently transfer into these new Microsoft programs without fear.”

Sylvia Martinez, Librarian Gustavus Public Library

we learn, but also in how we learn in the classroom and beyond. To succeed in this new environment means knowing how to access information, but also how to analyze and use it efficiently and effectively.

Keeping up with the explosion in information and technology challenges those in the work force to continually renew their skills and expand their knowledge. But education and lifelong learning are equally as important for the growing number of older Americans who may or may not be actively employed.

For people of all ages, lifelong learning is the key to longer, healthier, more satisfying and productive lives.

For librarians, continuous learning is critical to renewing the expertise and skills needed to teach and assist members of the public in the new information age.”

What can YOU do?

Make professional education and continuous learning a high priority for all library staff.

Make sure that you and your staff have the proper training and skills to assist library patrons and teach them about emerging technologies.

CE has never been more important!

The American Library Association recognizes the importance of education and continuous learning in providing the highest quality library service. The following information is from the ALA's [Education and Continuous Learning webpage](#).

“The ongoing revolution in information technology demands changes not only in what

“The Office 2010 webinars allowed me to confidently transfer into these new Microsoft programs without fear.”

Sylvia Martinez, Librarian Gustavus Public Library

we learn, but also in how we learn in the classroom and beyond. To succeed in this new environment means knowing how to access information, but also how to analyze and use it efficiently and effectively.

Keeping up with the explosion in information and technology challenges those in the work force to continually renew their skills and expand their knowledge. But education and lifelong learning are equally as important for the growing number of older Americans who may or may not be actively employed.

For people of all ages, lifelong learning is the key to longer, healthier, more satisfying and productive lives.

For librarians, continuous learning is critical to renewing the expertise and skills needed to teach and assist members of the public in the new information age.”

What can YOU do?

Make professional education and continuous learning a high priority for all library staff.

Make sure that you and your staff have the proper training and skills to assist library patrons and teach them about emerging technologies.

CE has never been more important!

The American Library Association recognizes the importance of education and continuous learning in providing the highest quality library service. The following information is from the ALA's [Education and Continuous Learning webpage](#).

“The ongoing revolution in information technology demands changes not only in what

“The Office 2010 webinars allowed me to confidently transfer into these new Microsoft programs without fear.”

Sylvia Martinez, Librarian Gustavus Public Library

we learn, but also in how we learn in the classroom and beyond. To succeed in this new environment means knowing how to access information, but also how to analyze and use it efficiently and effectively.

Keeping up with the explosion in information and technology challenges those in the work force to continually renew their skills and expand their knowledge. But education and lifelong learning are equally as important for the growing number of older Americans who may or may not be actively employed.

For people of all ages, lifelong learning is the key to longer, healthier, more satisfying and productive lives.

For librarians, continuous learning is critical to renewing the expertise and skills needed to teach and assist members of the public in the new information age.”

What can YOU do?

Make professional education and continuous learning a high priority for all library staff.

Make sure that you and your staff have the proper training and skills to assist library patrons and teach them about emerging technologies.

CE has never been more important!

The American Library Association recognizes the importance of education and continuous learning in providing the highest quality library service. The following information is from the ALA's [Education and Continuous Learning webpage](#).

“The ongoing revolution in information technology demands changes not only in what

“The Office 2010 webinars allowed me to confidently transfer into these new Microsoft programs without fear.”

Sylvia Martinez, Librarian Gustavus Public Library

we learn, but also in how we learn in the classroom and beyond. To succeed in this new environment means knowing how to access information, but also how to analyze and use it efficiently and effectively.

Keeping up with the explosion in information and technology challenges those in the work force to continually renew their skills and expand their knowledge. But education and lifelong learning are equally as important for the growing number of older Americans who may or may not be actively employed.

For people of all ages, lifelong learning is the key to longer, healthier, more satisfying and productive lives.

For librarians, continuous learning is critical to renewing the expertise and skills needed to teach and assist members of the public in the new information age.”

What can YOU do?

Make professional education and continuous learning a high priority for all library staff.

Make sure that you and your staff have the proper training and skills to assist library patrons and teach them about emerging technologies.

CE has never been more important!

The American Library Association recognizes the importance of education and continuous learning in providing the highest quality library service. The following information is from the ALA's [Education and Continuous Learning webpage](#).

“The ongoing revolution in information technology demands changes not only in what

“The Office 2010 webinars allowed me to confidently transfer into these new Microsoft programs without fear.”

Sylvia Martinez, Librarian Gustavus Public Library

we learn, but also in how we learn in the classroom and beyond. To succeed in this new environment means knowing how to access information, but also how to analyze and use it efficiently and effectively.

Keeping up with the explosion in information and technology challenges those in the work force to continually renew their skills and expand their knowledge. But education and lifelong learning are equally as important for the growing number of older Americans who may or may not be actively employed.

For people of all ages, lifelong learning is the key to longer, healthier, more satisfying and productive lives.

For librarians, continuous learning is critical to renewing the expertise and skills needed to teach and assist members of the public in the new information age.”

What can YOU do?

Make professional education and continuous learning a high priority for all library staff.

Make sure that you and your staff have the proper training and skills to assist library patrons and teach them about emerging technologies.

CE has never been more important!

The American Library Association recognizes the importance of education and continuous learning in providing the highest quality library service. The following information is from the ALA's [Education and Continuous Learning webpage](#).

“The ongoing revolution in information technology demands changes not only in what

“The Office 2010 webinars allowed me to confidently transfer into these new Microsoft programs without fear.”

Sylvia Martinez, Librarian Gustavus Public Library

we learn, but also in how we learn in the classroom and beyond. To succeed in this new environment means knowing how to access information, but also how to analyze and use it efficiently and effectively.

Keeping up with the explosion in information and technology challenges those in the work force to continually renew their skills and expand their knowledge. But education and lifelong learning are equally as important for the growing number of older Americans who may or may not be actively employed.

For people of all ages, lifelong learning is the key to longer, healthier, more satisfying and productive lives.

For librarians, continuous learning is critical to renewing the expertise and skills needed to teach and assist members of the public in the new information age.”

What can YOU do?

Make professional education and continuous learning a high priority for all library staff.

Make sure that you and your staff have the proper training and skills to assist library patrons and teach them about emerging technologies.

- [Top Ten Skills for Teaching Tech to Patrons](#)
- [Tech Talk with Michael Sauers: RFID, Checkout Kiosks, Security Gates and more!](#)

CE has never been more important!

The American Library Association recognizes the importance of education and continuous learning in providing the highest quality library service. The following information is from the ALA's [Education and Continuous Learning webpage](#).

“The ongoing revolution in information technology demands changes not only in what

“The Office 2010 webinars allowed me to confidently transfer into these new Microsoft programs without fear.”

Sylvia Martinez, Librarian Gustavus Public Library

we learn, but also in how we learn in the classroom and beyond. To succeed in this new environment means knowing how to access information, but also how to analyze and use it efficiently and effectively.

Keeping up with the explosion in information and technology challenges those in the work force to continually renew their skills and expand their knowledge. But education and lifelong learning are equally as important for the growing number of older Americans who may or may not be actively employed.

For people of all ages, lifelong learning is the key to longer, healthier, more satisfying and productive lives.

For librarians, continuous learning is critical to renewing the expertise and skills needed to teach and assist members of the public in the new information age.”

What can YOU do?

Make professional education and continuous learning a high priority for all library staff.

Make sure that you and your staff have the proper training and skills to assist library patrons and teach them about emerging technologies.
